

Mira Stanković, PhD

Dr. Mira Stanković is a research associate at the University of Belgrade, Institute for Multidisciplinary Research. Her focus of interest is in multidisciplinary fields such as analytical chemistry, food chemistry, environmental toxicology and monitoring, as well as biochemistry of natural products. Dr. Stanković has 12 scientific papers in high-ranked scientific journals. Her expertise is application of fluorescence spectroscopy on different types of samples and study of structural changes on macromolecules. She was a participant in the national project OI173017 "Study of the structure-function relationship in the plant cell wall and modification of the wall structure by enzyme engineering" funded by the Ministry of Education, Science and Technological Development of the Republic of Serbia. Also, she was a participant in the domestic project No. 6039613 "Detection and quantification of bioaerosols of importance for human and plant health in real time" funded by the Science Fund of the Republic of Serbia within the PROMIS program. Dr. Stanković is a researcher at the Center for Green Technologies, Institute for Multidisciplinary Research, University of Belgrade. She is a member of the Society for Plant Physiology, Serbian Biological and Biophysical Society of Serbia.
